DOC. No. XI.

REPORT

of

THE BOARD OF VISITORS

OF THE

VIRGINIA MILITARY INSTITUTE.

1853-4.

REPORT.

VIRGINIA MILITARY INSTITUTE, July 6, 1853.

is Excellency Joseph Johnson.

SIR,

The board of visitors of the Virginia military institute, assemed in annual session, respectfully submit the following

REPORT:

The board did not inspect the arms in the arsenal. They received a thorough spection in 1848, and at the last annual meeting the board made a partial spection, and found the arms in the highest state of preservation, so that this pard deemed it unnecessary to have the boxes again opened.

The examinations of the several classes were made under the superintendence f the board, and resulted in satisfying them, in the most satisfactory manner, not the professors are eminently qualified to fill their several positions, and that corps of professors could not well be found who could discharge their several elicate and important trusts with more fidelity and success.

Your excellency will find with this report the merit roll of the cadets, as ascertined at this examination, and the board especially notices, as the most distinuished of the several classes, the following cadets:

First Class.

- 1. James T. Murfee of Southampton.
- 2. William Silvester of Norfolk city.

Second Class.

- 1. R. C. Taylor of Norfolk city.
- 2. J. H. Lane of Matthews.

Third Class.

- 1. W. T. Patton of Richmond.
- 2. L. B. Williams, jr. of Orange.

Fourth Class.

- 1. F. H. Jeffress of Charlotte.
- 2. C. M. Barton of Frederick.

The duty of appointing pay and state cadets was discharged. The boa appointed state cadets according to the arrangement of the senatorial distric under the old constitution. The same difficulty in making these appointment now exists as was presented to your excellency in the last annual report. - B if the board had been satisfied that they were authorized to appoint according the new senatorial arrangement, the means of the institute would not justi the board in appointing so large a number. The board would most earnest request your excellency to recommend to the legislature the propriety of making an annual appropriation for the support of eighteen additional state cadet which would give one to each senatorial district under the new arrangemen Every one is now convinced of the importance of sending out native and qual fied teachers into all parts of the state, and the institute is doing that more effe tually than any other institution in the state. An annuity of \$5,000 is deemed sufficient for this purpose, as well as for the salary of an adjunct professor und the superintendent. The services of such an officer have now become indisper sable to the proper management of the institute. The duties of the superinter dent have become so complex and onerous, that it is impracticable for one ma to perform them, for any length of time, as now required. The interest of th state and the institute, and of those whom the state has undertaken to educate requires that provision should be made for the employment of this addition:

There is another matter of importance that the board would bring to the notice of your excellency, and through you to the legislature. The state cade are required to teach two years in the state after leaving the institute. Ver much to the credit of this class of cadets, this duty is very rarely neglected. But there are a few who are so destitute of honor and moral principle as to refuse the discharge this sacred duty, after receiving the otherwise gratuitous bounty of the state, and pledging themselves in the most solemn manner to the fulfillment of the obligation. The board would, therefore, recommend that an act be passed authorizing the recovery by suit of the expenses incurred in the education of all state cadets who refuse or fail to teach as required by law, and that no length of time be permitted to bar such recovery.

The appropriation made by the legislature for the erection of new building and improvement of the parade ground, has been exhausted. Owing to the high price to which everything has advanced, the estimate made has proved inadequate. The high price to which building material and mechanical labor have advanced, has materially affected the cost of the improvements. A new mess hall is now being constructed, for which no provision has been made by the legislature. This building has become necessary on account of the old one being too small, and so much dilapidated as to be unsafe. The construction of the mess hall was undertaken with the expectation that the cost of it could be defrayed out of the mess fund. But the great advance in the price of labor and provisions, without a consequent advance in the price of board, will probably render the mess fund insufficient to defray the cost of the building. The professors' houses are nearly completed, and the wings of the new barracks will soon be covered in. In order to get the wings covered in, so that they would be secured from injury by exposure to the weather, the superintendent has had to exceed the amount of the appropriation by something over \$3,000. In the inion of the board the superintendent acted wisely in persevering in the work til the buildings were so far completed as to be secure from injury.

It is now for the legislature to determine whether they will complete a work of much importance, on which they have already spent a considerable amount of oney. The sum of \$20,000 is deemed amply sufficient to complete all of see improvements, and then the eyes of the whole state can be turned with t pride to one of the most beautiful and useful structures in the state. We press the hope that the legislature will take early action on this important atter.

Heretofore and now the only music belonging to the institute is the fife and am. Every one having any knowledge of military affairs, whether in the nool or in the camp, knows the importance of having a good band of music. has as much influence upon the martial training of youth as it has upon the teran soldier upon the field of battle. The board therefore recommend that legislature make provision for the support of at least six musicians, to be disted for the institute.

Reference is made to the reports of the committees on the different departents for information as to the condition of each, and to the report of the superendent for information as to the whole. But more particular reference is
ade to the report of the committee on the quartermaster's department, because
eged abuses in this department were brought to the notice of the legislature
ring the last winter.

The board feel great gratification in referring to the results flowing from this stitution. From it our state is receiving a supply of highly competent teachs, society an addition of educated and high-toned gentlemen, and our public provements an impetus by receiving into their service a corps of engineers; d these results are but an earnest of what the institute will yet do, under the eral patronage of our venerable old commonwealth.

We have the honor to be

Your obedient servants,

FRANCIS M. BOYKIN, Pres't.

REPORT OF COMMITTEE ON INSTRUCTION.

The committee on instruction report that they have examined the subject to me referred, and find nothing which they think necessary to be brought to the pecial attention of the board. There are several changes suggested by the pressors in their reports, which the committee believe can be more appropriately posed of by the academic board, and the committee advise that the reports of professors be referred to the academic board for such action in the premises to them may seem most expedient. These suggestions relate to changes in edetails of the system of instruction as now arranged.

The system of instruction appears to have been conducted in a very satisfactry manner. The proficiency of the cadets, as exhibited in the examinations inducted under the personal observation of the board, is the best evidence of its

iciency.

All of which is respectfully submitted.

REPORT ON QUARTERMASTER'S DEPARTMENT.

The undersigned, committee on the quartermaster's department, submit the

lowing report:

The committee have examined, with much attention, the operations of this partment. The goods appear to have been judiciously selected and purchased advantageous prices. The committee are satisfied that the articles needed by e cadets are furnished through this department at prices considerably lower an they could be otherwise obtained. They are sold to the cadets at an avege advance of 20 per cent. on the invoice price; some articles of more general cessity are furnished at an advance less than this, while the general average is aintained by a larger price on other articles. The prices of none of these arties, however, exceed, nor perhaps equal those obtained in the retail stores for ticles of similar quality. The committee highly approve this discrimination, as is most favorable to cadets of limited means, whose supplies are restricted to ticles of necessity.

By reference to statement (1,) it will be seen that the amount paid by the easurer, on account of the quartermaster's department during the year, is 21,621 93, which is offset by credits from sales of merchandise to officers and adets during the same period, amounting, together with balance on last year's ettlement ($\$423\ 67$,) to $\$22,535\ 93$; which leaves a balance to the credit of the

uartermaster's department, of \$914.

By reference to statement (2,) it will be perceived that the liabilities of the deartment amount to the sum of \$9,307 32, and that there remains in the hands f the quartermaster available property of the uet value of \$10,337 71—all of which will be in requisition during the next year. This leaves a balance in favor f the department, of 1,030 39, which, with the balance against the treasurer of 1914, leaves a total balance of \$1,944 39. In this balance, however, is included he amount due by ex-cadets, as exhibited in statement (4.) This amounts to the um of \$1,685 78, of which \$600 are estimated to be bad debts. If those debts hould prove bad, this amount will have to be refunded to the treasurer, and of course must be deducted from the general balance, as stated above. This would eave a balance of \$1,344 39, including property on hand. This is the result of the operations of the department for ten years, and shows that it has not been the purpose of its management to make a profit upon the sales. It has simply accomplished the object of its establishment, to provide the supplies of the cadets at the lowest prices practicable.

Statement (3) exhibits the operations of the tailoring department. The payments to the tailor amount during the year to \$1,755, and the receipts for articles of clothing amount to \$1,871 56. The committee are satisfied that this department has been well managed, and much credit is due to the quartermaster for the efficiency and fidelity with which he has discharged the duties devolving [u] him. His compensation is inadequate, being less than that paid elsewhere similar services. The committee have no hesitation in recommending the adtion of the superintendent's suggestion, that an addition of \$200 be made to quartermaster's salary.

Respectfully submitted.

REPORT OF COMMITTEE ON SUBSISTENCE.

They found the department organized in its plan and executed in its details in the amanner as to secure efficiency and economy in its administration. The artments are in good order, and the provisions furnished to the cadets, the comttee is warranted in stating, are excellent in quality and abundant in quantity. The resolution adopted by the last board, directing the erection of a new mess ll, is in progress of execution, by the accumulation of materials purchased with profit fund of this department. But as this fund has decreased, and is probly destined still farther to be diminished in consequence of the enhancement the price of provisions and the value of labor, the completion of the work ast necessarily be delayed to a late period, if that resource is alone relied upon. It is therefore recommended that an appropriation be asked for from the legisture, of a sum of money adequate to the immediate completion of the mess ll, and thus at once relieve the cadets from the inconvenience and danger of

All of which is respectfully submitted.

e present dilapidated structure.

Committee.

GEN. F. M. BOYKIN,

President B. V. V. M. I.

REPORT OF COMMITTEE ON DISCIPLINE.

t seems to this committee that the external discipline of the corps of cadets decidedly improved, and is probably better than at any former period. The ice is fully as good as could reasonably be expected while extensive building erations are in progress. The drill, as exhibited in the field exercises before, board, is quite as good as heretofore, although much inconvenience is occaned by the coming in of new cadets at late and irregular periods. In conction with this subject, the committee recommends that new cadets be required report for duty as speedily as possible after receiving their appointments, so it they may have the full benefit of a preparatory course in the school of tactics ring the encampment, and be better prepared for military duty before going o quarters.

It affords the committee much satisfaction to report, as we think we may with nfidence, that the ungentlemanly and discreditable practices upon new cadets, nich the board of visitors has for some time desired effectually to repress, may we be considered as existing no longer. The good sense and manly feeling of e corps of cadets have raised up in aid of the authorities, in fact of the charact of the institute, the most effectual remedy for this crying evil, which we trust

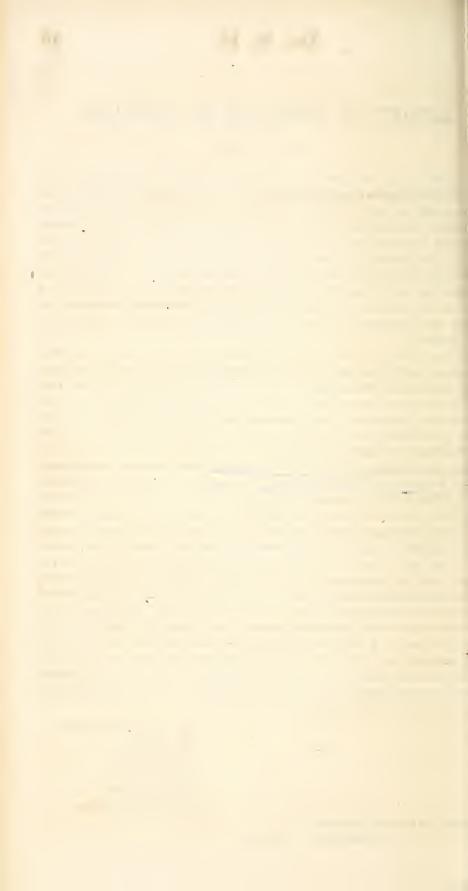

d believe will be heard of no more.

Very great inconvenience has frequently existed, and is likely very soon to occur ain, from the want of suitable music. Although the superintendent is authozed by law to enlist musicians, no provision has been made for their pay and bsistence, the annual appropriations from the treasury being barely sufficient keep the institution itself in progress. The superintendent has consequently en compelled to rely upon hiring musicians for longer or shorter terms, accordg as he could obtain the services of this capricious and uncertain class of cople, who will often engage to-day for twelve months' service, and to-morrow olate the engagement and go off. At a great military school like this, music is dispensable, and is required almost every hour of the day, and the best remedy or the inconvenience which has always existed here, the committee thinks, ould be found in a small but efficient band of good musicians. It is therefore ecommended that a provision be asked of the legislature for a band of six ensted men, to be employed as musicians at this post. The expenses it is believed rould be inconsiderable, and very far outweighed by the advantages and indisensable services which would thereby be secured.

SUPERINTENDENT'S REPORT.

HEAD QUARTERS,

Va. MILITARY INSTITUTE, June 20, 1853.

IR,

I have the honor to present herewith my annual report of the conon of this institution.

FINANCES.

The financial operations of the institute are embraced under four distinct ds. 1. Virginia Military Institute. 2. The Quartermaster's Department. The Subsistence Department. 4. The Building Fund. Full exhibits of each these departments accompany this report, and are marked A, B, C and D.

. The Virginia Military Institute account embraces in its receipts the annual te appropriation, the pay of the ordnance sergeant, the tuition fees of the pay lets, the fees for diplomas, and commissions for the safe keeping and disbursent of the cadets' deposits.

These receipts, upon the basis of 90 pay and 32 state cadets, amount in the gregate to the annual sum of (A) - - 14,845 00

This account is chargeable with the pay of the professors, surgeon, asurer, ordnance sergeant, and musicians; with the support of the te cadets, and with contingent expenses for servants, &c., amount; in the aggregate, and upon the basis of 32 state cadets, to the nual sum of (A)

ual sum of (A) - - - 13,900 00

Annual surplus, - - - 945 00 nis surplus was charged during a part of the past year with the

aving a balance against the Va. military institute account, of \$327 04

As the receipts for tuition, diplomas and commissions are contingent, the ard will see the propriety of not extending the liabilities of the Virginia mility institute account, the annual surplus of \$945 being small enough to meet contingencies of this account. The number of state cadets cannot, therefore,

support of 10 additional state cadets, amounting to

be increased beyond the number prescribed by law, viz: 32. I would, howe renew my former recommendation, that provision be made for the reception 18 additional state cadets, so that the number shall correspond with the pressenatorial districts of the state. The cost for their support would amount about \$3,000.

2. The Quartermaster's Department supplies the clothing, fuel, lights, boostationery, beds and washing of the cadets.

The receipts embrace credits for the amount of goods sold at an advanc-20 per cent. upon the invoice price of such goods, and the actual cost price the fuel, lights and washing furnished. The total amount of these receipts the past fiscal year was (B) 22,112 This department is also credited with the stock of goods on hand, 10,337 as per inventory, 423 Balance on treasurer's account, June 15, 1852, 32,873 Total credits, The debits against this department embrace the amounts paid out for goods, fuel, lights, &c., and for house rent and fuel of professors, making an aggregate for the past year of (B) 21,621 93

Existing liabilities, (B,)

Total debits,

Total debits,

Total debits,

Existing liabilities, (B,)

Total debits,

Total debits,

Total debits,

Balance to the credit of this department, \$1,944

Of this balance, the sum of \$1,685 78 is due from cadets who have left institute with balances against them—\$600 of which may be considered the debts.

The report of the quartermaster, Mr. R. H. Catlett, with the books of department kept by him, will explain every transaction of the past year. T funds by which the heavy operations of this department are conducted, are rived exclusively from the deposits of the cadets. A minute examination of in all its details, is earnestly requested, as an act of justice to the officers w are charged with the heavy expenditures belonging to it, and to satisfy the box that due care is taken to guard the interests of the cadets in the quality a price of the goods lurnished to them. The heating, lighting and washing rangements, which are embraced in the operations of this department, will cla the special consideration of the board; and the superintendent feels assured the the complaints existing in part last year, in the imperfect washing, have be entirely removed by the new system then adopted. It has been impossib during the past year, to test fully the comparative expense between the prese and the former systems of heating, lighting and washing, owing to the fact th the arrangements for them are only recently perfected. A careful account w be kept for the coming year, and the result reported. Our experience fully co firms our expectation as to the comfort, safety and cleanliness of the syste now in use.

The examination of this department will, I am sure, satisfy the board that t salary of the quartermaster is not in proportion to the duties or responsibility of his office. It is now only \$500, and it is respectfully recommended that it increased \$200.

	The Subsistence Department conducts the mess arrangements of	the cadets.
P	credits embrace the allowance for the board of the cadets, labore	rs and ser-
115	s, for the forage of the teams, and for sales to officers, amounting	in the ag-
	ate for the past year to (C)	14 ,600 0 6

At the last meeting of the board, the superintendent received instructions to oceed at once to the erection of a new mess-house, upon the plan and estiates laid before them. This building, which will contain accommodations for e board of visitors, has been commenced, and will cost about \$10,000. The eaus to meet this expense were based upon the annual surplus in the receipts the subsistence department over current expenses. The tabular comparative atements of the steward, which have been carefully prepared, will show that e estimated surplus will, in all probability, be considerably diminished by the eat advance in the price of provisious and labor; and thus our ability to meet ir engagements will be materially affected. The board may remedy this, by creasing the rate of boarding, as has been done in most of the boarding estabshments of the country. But it is very desirable to avoid this advance, if posble, especially as this charge upon the department, though an urgent one, is uly temporary. I have thought that the accommodations for the board of visiors, not being properly chargeable to the subsistence department, might be proided for by a special appropriation from the state. The necessity for their ecommodation has heretofore been so apparent, that the board have subjected nemselves to the inconvenience and discomfort of occupying the temporary arangements provided for them at the institute, rather than quarter themselves in be town. An appropriation of \$5,000 would provide suitable accommodations or them in the new mess-house, and thus so reduce the cost as to place the balance within the means of the subsistence department without increasing the charge boarding. An examination of the building now used for a mess-house satisfy the board that it is unsafe, and could not be occupied another year wout great risk.

out great risk.			
4. The Building Fund is credited with the	sums ap	propriated for	the erect
of the cadets' barracks, professors' houses,	and heat	ing and lighti	ng arrau
ments, amounting to -	-	′ -	76,000
The disbursements on this account have amou	inted to	-	72,957

The liabilities outstanding amount to (D)	-	-	8,037
Excess of expenditures over appropriation,	-		\$3.195

The superintendent has endeavored, in all the progress of these improvement to limit his engagements to the means in his hands for these purposes. In extensive a work as he has had before him, the most carefully prepared estimar are liable to variation from the many causes which operate to produce them, a which no human skill can at all times foresee. But this variation has been a markably affected by the rapid advance in all species of building materials, equin the case of iron, to nearly 75 per cent., and the consequent advance in species of mechanical labor. Still, with all these drawbacks, the superintende would have arrested the work as soon as his means were exhausted, did not a security of the building commenced require a prosecution of it until it was a covered, and thus protected from the weather. To accomplish these ends, und the disadvantages referred to, he has exceeded his estimates only \$3,195 45.

The superintendent hopes that provision will be made to complete the twings now or soon to be covered in, the estimate for which is \$11,804 5 making, with the above balance, the sum of \$15,000.

As the superintendent has had the entire personal superintendence and dire tion of these extensive improvements from the beginning, he desires that the boa would give to this subject a careful consideration, and satisfy themselves fully: to the manner in which his duty in this respect has been discharged. With the above sum of \$15,000, these improvements will have cost only \$91,000, a su which will be found to be far below the ordinary cost of such buildings.

In the above exhibit of the financial operations of the institute, it is important to bear in mind that the "Virginia military institute" account alone is that upce which the current support of the institute depends. The subsistence department account and the quartermaster's account embrace the operations of department which were organized upon the principle of being self-supporting, and although they have enabled us to provide for many necessary wants which the Virgini military institute fund did not and could not meet, no charge out of the legitimat range of these departments should be imposed upon them. The treasurer report very properly consolidates the balances on all these accounts in his recapitulation as exhibiting the actual state of the funds of the institute. The building fund is of course a special fund, kept distinct as having reference to special operations—not presumed to be permanent.

COURSE OF INSTRUCTION.

The course of instruction in the institute is distributed among six distinct partments, viz: 1. Mathematics. 2. English and Latin languages. eering, drawing and geography. 4. Chemistry, geology and mineralogy. Natural and experimental philosophy. 6. French language.

1. The mathematical chair is held by the superintendent. Instruction is given the 2d, 3d and 4th classes, divided into 8 sections—each section occupying one fur and a half daily. In these duties he has been efficiently assisted by Capt. D. Stuart and Lieut. Jas. W. Allen. With every disposition, from personal well as official consideration, to carry out the order of the board of June 1851, appointing an adjunct professor of mathematics, an examination of the means the institute has satisfied me, as I am sure it will the board, that without ditional aid from the state, such a burthen cannot be assumed. The board are ly aware of the considerations which prompted their order, and the superinadent would refer to his special communication as setting forth the urgency of e appropriation for the relief which has been asked.

2. In the department of English and Latin, instruction is given to the 1st class rhetoric, English grammar and literature and logic—and to the 2d and 3d asses in Latin, embracing in all 8 sections, with one assistant, Lieut. Thomas . Harris. The professor also superintends the declamation and composition ercises of the 3d and 4th classes, once a week, for a portion of the session.

3. The engineering, &c. department is under the exclusive charge of the prossor, and embraces five recitations a fortnight of the 1st class in two sections in igineering; triweekly drawing lessons to the entire 2d class of two hours each; iweekly drawing lessons to the 3d class of two hours each, from the 15th muary, and at the same hours as the 2d class; and recitations in geography by te 4th class to the 1st January.

4. The chemical department is under the exclusive charge of the professor. s duties consist of recitations from one section of the 2d class in chemistry twice week, and the same number of recitations from two sections of the 1st class in eology, mineralogy and agricultural chemistry. To the professor of this departent is assigned the duties of commandant of cadets and instructor of infantry ictics, and in these duties he is assisted by Capt. Stuart and Lieuts. Allen and farris.

5. The philosophical department is under the exclusive charge of the professor. the instruction is given to two sections of the 1st class and to one section of the d class, making a daily recitation of three hours. To the professor of this de-

artment is also assigned the duty of instructor of artillery.

6. The French department gives instruction in the French language to two secions of the 3d class, reciting daily one hour each, until the 1st January; and to our sections of the 4th class in English and French, with daily recitations of one our each. The instructor of French is assisted by Cadet Silvester, who has harge of one section.

Bible instruction is given gratuitously on Sabbath afternoon by the superintenlent to the 1st and 2d classes; by the professor of English and Latin to the 3d

class, and by the professor of chemistry to the 4th class.

The above outline, together with the special reports of the professors, whare herewith presented, and to which, with the suggestions contained therein, attention of the board is invited, will give a full view of the course of instruct in the institution.

The special consideration of the board is called to the report of the comm dant of cadets in reference to the necessities of the corps of cadets for a milit band. Martial music is not only an essential in all military establishments, but such an institution as this, the influence of a good band would be great in p moting order and discipline. To these considerations I would add, that cadets are annually subjected to the necessity of hiring music for the graduati exercises, at an expense of some \$300 for two or three days' service. It do not seem to be right that they should bear this expense, and yet their desire and dependence upon the music are so great, that they would undergo any st denial within their means to procure it.

WATER PRIVILEGE.

From the summary steps taken by the authorities of the town of Lexington stop the water privilege possessed by the institute under special contract with t town, it became necessary for the superintendent, at the April term of the suprior court, to apply for an injunction. A temporary injunction was granted, at the case will be tried on its merits in September next, unless in the mean time a micable adjustment of the matter in controversy can be effected. In the spi of compromise suggested by the court, the superintendent presented to the corpration of Lexington the proposition marked E, and accompanying this report, which he received a verbal reply that it was not accepted.

INVESTIGATION BY A COMMITTEE OF THE SENATE.

Upon the complaint of Peyton Johnston of the city of Richmond, a committed of the senate was appointed in March last to enquire into the general management of the institute, and particularly into the conduct of the superintendent is dismissing the ward of the complainant, Miles C. Macon. The superintended promptly obeyed the summons of the committee, and afforded to them and to the complainant every facility for a full examination into his official conduct. The result of the investigation was a report from the committee, which is herewith presented. The testimony was carefully taken down, but has not been printed. The superintendent would suggest whether it be not expedient and due to the institution that the entire evidence be printed. Satisfactory as is the report of the committee, it is desirable and proper, when public officers are charged with malfeasance in the discharge of their duty, and are arraigned before the tribunation of the public, that the fullest publicity be given to their vindication.

One subject claimed the attention of the committee which is not adverted to in their report, viz: the practice of maltreating the new cadets. I had always considered that these practices resulted from the thoughtlessness and inconside ration of youth, and could be best arrested by an appeal to the pride and honor of the cadets themselves. I have constantly opposed stringent orders of discipline on this subject, believing that they tended rather to aggravate the grievance, by driving the offenders into more secret modes of tormenting the new cadets. Such were the views presented to the committee. They were deemed reasonable, and I assumed the responsibility of pledging the cadets to an entire disuse of such practices for the future; if authorized and permitted to present to

m the duty which their honor and the reputation of the institute demanded of m. I am happy to be able now to report that this pledge has been redeemed, I beg leave to lay before the board the proceedings of a meeting of the ets on the subject, to be communicated to the general assembly. The course opted by these cadets is in the highest degree honorable to them, as evincing a termination not to render to others what they have themselves received; and I fullest publicity should be given to their proceedings.

n connection with the subject, I would state that the committee of the senate sgest, what must be manifest to all to be much needed, a complete review and lassification of our regulations. The seeming conflict between many of them the kes it difficult to interpret them, while the many changes introduced in later

ars render this revision indispensable.

This session completes the 14th year of the Virginia military institute. It is atifying to its friends and to the friends of education everywhere, to trace its ogress from its rude and stormy origin to the respectability, reputation and luence which it now enjoys. Engaging at first the interest and co-operation only a few friends, and upon untried and doubtful experiment, it has forced its my by slow but certain steps into public notice, possessing at home the confince and support of the people of our state, and enjoying abroad a reputation ual with that of the highest of our American institutions of learning. In this ne, the rude soldiers' barracks have been replaced by the handsome quarters w occupied by the cadets; the germ of a library and philosophical apparatus is been formed; the heavy artillery and infantry arms have been substituted by e beautiful battery and percussion musket of the cadet; while the course of struction has been by degrees extended, so as to embrace as full a range of ientific and literary studies as was compatible with the character and destiny of le institution. Already we have prepared for the duties of life 227 graduates, ve-half of these having been making their impress upon the educational interests f our state, upwards of 50 being now engaged in the duty of teaching. Some I more are actively pressing forward the internal improvements of the state, taking at this time nearly 100 of our graduates who are lending the influence of neir talents and education to the development of these two important state inprests. And these are Virginia youths who are engaged in these works! What reform! It is no longer a reproach to a Virginian to teach in our schools or to abor at the rod of the engineer. We are no longer dependent upon northern eachers and northern engineers-but now, with the co-operation of our sister tate institution of learning, we are sending abroad the native teacher and the ative civil engineer to form the mind and to develop the resources of our own

I would devoutly recognize the hand of God in all that he has enabled this astitution to accomplish; and commending all its interests to the respectful conideration of the board,

I am, very respectfully,

Your obedient servant,

FRANCIS H. SMITH, Sup't V. M. I.

GEN. FRANCIS M. BOYKIN,

Pres't Board Visitors V. M. I.

FRANCIS H. SMITH, Sup't Va. Mil. Inst. B.

QUARTERMASTER'S REPORT AND ACCOMPANYING DOCUMENTS.

QUARTERMASTER'S DEPARTMENT,

VA. MILITARY INSTITUTE,

June 19, 1853.

bl. F. H. SMITH,

Superintendent V. M. I.

SIR,

I have the honor to present herewith detailed statements of the cerations of the quartermaster's department for the present fiscal year, ending ne 30, 1853.

Statement 1 exhibits the amount of payments made by the treasurer of the riginia military institute, on account of the quartermaster's department, during year, amounting to \$21,621 93, which is offset by credits from sale of merandise to officers and cadets, amounting to \$22,535 93, leaving a balance to credit of the department, of \$914.

By reference to statement 2, it will be perceived that the liabilities of the dertment amount to the sum of \$9,307 32; to meet which, there remains in arge of the quartermaster property to the amount of \$10,337 71, as per inveny, leaving a balance in favor of the department, of \$1,030 39, which, with the lance of \$914 against the treasurer, leaves a total balance to the credit of the partment, of \$1,944 39.

Statement 3 shows the number of coats, pants and other articles of clothing nished to the cadets during the year, as specified in the monthly abstracts of a tailor employed by the department. The receipts from the manufacture of ese articles, at the fixed prices exhibited in the statement, amount to the sum \$1,871 56. From which deduct the payments to tailor of \$1,755, and the lance is the gain accruing to the department from this source.

The balances still due by ex-cadets, as exhibited in statement 4, have been arged to the treasurer, and included in the total balance to the credit of the partment. Should the debts prove bad that are so marked in the statement, e amount will have to be refunded to the treasurer, and deducted from the esent balance against him.

The quartermaster's department has been in operation for ten years, and the lance to its credit, including bad debts and perishable property, amounts to ,944 39. This department, therefore, instead of being a source of profit to e institute, really embarrasses its financial operations, inasmuch as the heavy

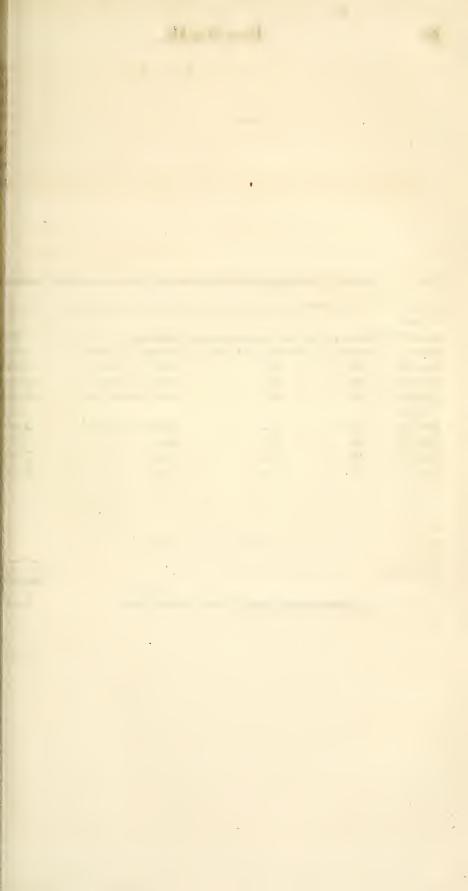

outlays which we are compelled to make, with no means but those furnished the cadets, often requires temporary aid from the funds of the other departmen. It must also appear from this small balance, that the object for which this partment was established, to furnish good and necessary articles of clothing the cadets at the lowest possible prices, has been fully met in its management.

The quartermaster would respectfully request a careful examination of department in all its details, by the board of visitors, that they may satisfy the selves of the cheap and substantial character of the goods, and of the accur. with which the accounts of his department are kept.

Respectfully submitted.

RICHARD H. CATLETT,

Quartermaster V. M. 1

Subsistence Department V. M. I., June 1853.

ol. F. H. Smith, Superintendent V. M. I.

r .- To balance on treasurer's ledger,

utstanding claims against the department,

SIR,

Herewith I have the honor to present the required annual exhibit f the operations of the subsistence department for the year ending June 1853.

The current expense and sinking fund accounts show the balance remaining be \$1,438, of which sum there has been expended \$233 22 in the purchase of laterial for building the new mess hall, leaving a balance of \$1,204 78 available or this purpose, as exhibited thus:

oss by ordinary wear, breakage, &c			246 70	
oss of ordinary wear, broakago, we	.•			$285 \ 34$
				\$4,001,23

Being 18 cents per month to each cadet for ordinary breakage and weapst perishable articles, and is exclusive of the estimated depreciation in value of the more costly, though less destructable articles, as the steam generator, range, debake-oven, which, being in daily use, are liable to give out at any time, dethereby greatly increase the loss sustained in the current use of cooking utems. In making an estimate, therefore, of the entire cost of subsisting each cade it would be necessary to at least double the above amount, making it 36 cents at the probable loss by breakage, wear. &c. of utensils and furniture. This, where the monthly average of \$6.42 as exhibited in the table prepared for that prose, gives the sum of \$6.78 as the monthly expense, leaving the balance, cents per month each, to meet the various contingencies that necessarily occarious and an establishment.

In addition to the usual papers presented, a comparative statement, table, has been constructed, by which, it is hoped, the causes producing the increased the cost of maintaining the establishment will be fully apparent. By refere to this table it will be seen that a gradual increase in the cost of provisions is been going on for the period indicated therein, until now, 1853, it has reached about ten per cent, over that of 1850.

Table 2, appended to the above, shows the comparative consumption of soc of the principal articles of provision by each person subsisted in 1850 and 182.

The furniture. So, of the hospital having been turned over to this department together with the whole charge of its maintenance, a statement is herewith posented, setting forth, in part, the receipts and disbursements on this account during the past year.

Respectfully submitted.

JNO. T. GIBBS, Com'y Sub. V. M. I

## Proceedings relative to Maltreatment of Cadets.

August next, on the 11th day of June 1853, for the purpose of drafting resolutions cerning the maltreatment of cadets:

In motion of E. L. Smith, G. P. C. Rumbough was called to the chair, and Wm. Y. C. ite appointed secretary.

'he object of the meeting having been briefly explained by W. J. Sergeant, and quesis relating to the object of this meeting having been fully discussed, it was

Inanimously resolved, that the president should appoint a committee of five, whose duty hould be to draft a series of resolutions condemning the unjust treatment of new cadets gived at the Virginia military institute, which has hitherto, in a great degree, dimmed its atcheon.

'he president thereupon appointed the following gentlemen: R. J. Fletcher, C. J. F. ord, J. L. Cross, R. M. McKinney, L. W. T. Patton.

on motion of L. W. T. Patton, the president and secretary were added to the committee. Whereupon, the committee presented the following preamble and resolutions, which e received and adopted by a vote of 40 to 3:

Vhereas we, the cadets of the Virginia military institute, who matriculated in the year 2, seeing the ill effects produced by the maltreatment of new cadets, and feeling the censure which has been pronounced upon such a course of conduct by those who feel sep interest not only in the welfare and prosperity of the institute, but also to maintain characters as Virginians, and gentlemen of high toned and polished deportment: efore,

Be it resolved, that we believe the maltreatment of new cadets, by dragging, twisting, otherwise inflicting bodily injury, as has heretofore existed at the Virginia military inte, to be in the highest degree detrimental both to the interest and honor of the intion.

Resolved, that inasmuch as many and grevious complaints have been manifested by legislature of Virginia and the people generally, against the superintendent, on account his maltreatment, we desire to exculpate him entirely from any charges of which he has a accused, and believe that it is entirely out of his power to prevent it, unless he be indeed by the cadets themselves; and we take pleasure in testifying to the friends and ons of the institute our determination to abstain not only from the abuse of new cadets selves, but use our most strenuous exertions to prevent others from so doing.

Resolved, that the proceedings of this meeting and a copy of these resolutions be preed to the superintendent, as an assurance that the honor and integrity of the institution I be preserved, as far as in us lies, from such reproaches in future.

Thereupon, the meeting adjourned.

G. P. C. RUMBOUGH, President.

IM. Y. C. WHITE, Secretary,

Doc. No. 11.

# LETTER.

ROCKBRIDGE ALUM SPRINGS, July 8th, 1853.

Excellency Joseph Johnson.

BIR,

Having been present at the examination of the cadets of the Virginia military titute, just terminated, by invitation of the board of visitors, it has occurred to me, that tough not officially called upon to do so, I might, without impropriety, lay before your cellency the impressions made upon me by my visit to this school, as a subject of some erest to you, coming from an officer of our national military academy, who has been nected with it, either as pupil or instructor, for the last thirty years.

So long familiar with the workings of a system of training like that pursued at the Virtia military institute, I may claim to have entered upon the scrutiny before me underndingly. To say that I was in the highest degree gratified with everything I observed at institute, as to its state of discipline and the results of the scientific and literary instructurent exhibited by the thorough examination of the classes, is to pay but a well deserved logium to the labors of its superintendent and corps of instructors. An off-shoot, to me extent, of our national military school, the resemblance of the offspring to the parent s at times so striking, that I felt as if presiding at an examination of the pupils of the ter.

As the details of this examination will come before your excellency from another and ore responsible source, it will not be expected of me to enter upon them here. My dee is chiefly to unite my testimony to that of the highly distinguished gentlemen who contute the board of visitors, as to the fidelity and efficiency with which those have discharged it duties to whom the state has intrusted this important institution, and to add my own two of its value to Virginia; on which last point, I must crave your excellency's indulnce to say a few words.

I need hardly call attention to the fact—notorious to every man of mature age in the te—of the low condition of scientific knowledge and common school education throughout rginia, to within but a very few years back. Scarcely was there an academy of standing here scientific instruction, in any measure worthy of the name, could be obtained; and r higher seminaries of learning were, for the most part, in a not much better condition. shool teachers had to be procured from abroad, because the young men of the state, who have were fitted by a collegiate education to perform the important functions of this vocaton, either felt that it would be a kind of degradation to stoop to it, or else found that the her professional avocations opened up more alluring prospects for wealth and ambition he profession of civil engineering had not an existence; and of the few who had assumed

it, rarely could one be found who had the slightest tincture of science upon which to his pretensions. Military knowledge, that essential element of a nation's safety, while like our own, depends upon her citizen soldiery in a moment of danger, was at the love To so great a degree was this the case, that it may be safely averred, at the case, mencement of the war of 1812, twenty-five native born citizens could not have been brot together, throughout the entire length and breadth of our country, who were capable discharging the simplest duties of military engineers in the field. An important step taken towards remedying this untoward state of affairs, in the organization and gradual ] gress of the national military academy; and here for a while effort seemed to have res Having a special object in view, the wise founders of that institution did not contemp what it has fortuitously, as it would seem, accomplished through its graduates, who, have been educated for a military career, subsequently threw themselves into the walks of life, and fortunately directed their attention to the pressing wants of the moment, for wh their training had more peculiarly adapted them, those of teachers of science and civil gineers. But even after this result had become to some degree salient before the pu eye, still its full consequences were either not appreciated, or men seemed to look u such institutions as the national military school rather as the concern of the nation tha the individual states; and it was left to Virginia, urged to it by the almost unaided eff of one of her sons, to take the lead in what to many appeared hardly a doubtful experim What was thus undertaken with misgiving has, as if by magic, been almost comple The work thus commenced is no longer "in the full tide of successful experiment;" i un fait accompli, a fixed fact. The foundation of a noble structure has been broadly solidly laid, and all of the essential superstructure raised. There remains but to fir those details which demand time alone to render the edifice in all points worthy of the s which called it into being. The moment of completion must rapidly follow; for in this in all that pertains to the honor, the dignity and the strength of the commonwealth, strongly appreciative good sense of the people will go before those whom they have vated into the positions of their legislators and rulers. They not only reason out, but t actually feel that they have, in this matter, done a work, in their day, for which their ] terity will be deeply grateful. The thing is tangible to them. It is brought home, thro the graduates of the institute, to every district, every county, every town, every village every fireside. The happy thought of mingling the state cadet with the pay cadetplacing honorable, meritorious poverty side by side with wealth and rank in the race honor, with the prize before them inscribed detur digniori, and the certainty that it will awarded as inscribed, cannot fail to make of the institute the fondling of the people; justly, so long as strict impartiality, regardless alike of the influence of station, of we and of party, shall preside over its councils. To you, sir, and to your successors in the sponsible office you now fill, is the fate of this fondling mainly committed. Let me, th adjure you, in the name of science! in the name of all that elevates and ennobles our speci that you look well to it—that no one receive from you a controlling voice in the destinied this noble institution, who is not, in all respects, equal to the task. Let none be called you to direct its course but men whose purity, firmness and integrity of character can vouched for by every citizen of all parties-men whose past lives can be pointed to a model for imitation to the youth who shall appear before them-men who all feel are in pable of doing even a questionable act, and who will do nothing and know nothing in lation to their trust but what conscience tells them is for the public weal. Let this be do and there will be no act of your administration for which your fellow-citizens will he more cause for grateful remembrance; none upon which you yourself, in the retirem of private life, will reflect with feelings of more satisfaction.

But I must crave your excellency's indulgence for having allowed myself to be carn off from the object I mainly had in view, that of stating my impressions of the institute and calling attention to what it has already accomplished. Dating back only fourteen ye the most of which have been years of struggle for a bare existence, the institute has in

received within its walls 597 pupils, 159 of whom were state cadets. It has sent forth n them 226 graduates, and 371 others who have but partially partaken of its benefits. its graduates 86 have become teachers, and 22 are employed as civil engineers-the nainder being in almost all the other various walks of civil life. Comment on these ılts is unnecessary. How a little leaven soon leavens a great lump, every housewife can -a truth which is now being felt by all in reference to the institute. I have witnessed classes at the last examination discuss the most abstruse problems of science in a manthat would have done credit to any institution. To particularize might seem invidious, I may be permitted to single out the graduating class, as their course at the institute is shed, numbering 25 members, as having exhibited throughout all their branches the untakable evidences of industry and great promise. Here, then, we see a band of 226 aths in all, sent forth from their alma mater, any one of whom, should the country be inved in war on the morrow, would be able to perform with accuracy the duties of suberns of engineers in the field, a fact in striking contrast with the destitute state of the ion in this branch of the military art in 1812-to say nothing of the qualifications of se young men as officers for the volunteers and other forces of the state, and their ability teachers and civil engineers.

Should the question be asked, what benefit does the state derive from those who do not duate? it may be answered, that they also will find their place, should their services be led for in the field, or in the less conspicuous sphere of the school-house. Of this class, barated from the institute for various causes, some remain there only six months, some e year, others two, three and even four years. Now, it must be recollected that each e, during his stay at the institute, receives his quota of its instruction, and is under daily litary training; and it may be safely averred that any one, who remains only six months der such a regimen, will carry away with him more correct notions of military discipline, d will be better fitted for drilling men than nine-tenths of the officers under our present litia system.

But the great feature of the institute, so far as forming good citizens as well as good ldiers is concerned, is its system of discipline. This subject has already undergone a arching investigation before a committee of the legislature at its last session, and it is to hoped is finally settled. It is one that cannot too forcibly be insisted upon, as it is in th the foundation stone of the moral fabric of the institute. Without a rigid enforceent of attention to minutiæ, there cannot be good order, nor, in fact, any order mainined. Who has not felt this in domestic life? What prudent parent would be willing to opard a child's future welfare, by placing him in a position where he would not be subcted to every restraint that can beget in him habits of punctuality, of strict attention to ity and of self-control? To such ends does the discipline of the institute look; and ese it endeavors to attain by a system of demerit marks, which, when a certain limit is anscended, ipso facto separates the pupil from the school. Cases of a painful and even delicate nature arise under this rule, appealing strongly to the sympathies of the board of sitors. It may seem hard to dismiss a youth for an infraction of rules involving no moral epravity, and thus, to some extent, blight his prospects in life. The object of the institute not to punish the depraved, but to form citizens who shall be useful to the state; men hose early lives give a guarantee that they may be confided in when placed in stations of ust. Were the requirements of discipline at the institute anything more than every youth an readily conform to, it would be hard to dismiss him for not conforming to them in a asonable extent. But so far from this being the case, it not infrequently happens that oung men pass their entire term there without incurring a single demerit mark. But the uestion, truly presented, is, shall the public interests be made to yield to the private adantage of the individual? Either a youth will not, or, from some mental or moral defect, e cannot be brought to conform to rules which a long experience has shown to be indisensable in the government of an institution like this. Upon what plea of justice or well onsidered expediency should either of these classes be suffered to form an exception? The question admits of but one answer; and fortunate has it been for the welfare of t institute that the boards of visitors have set their faces sternly against any violation of t safeguard. They have felt that admission to the institute is a great boon from the state the pupil—one that is yearly becoming more valuable, and will be eagerly sought after hundreds of youths. They feel that the diploma conferred on its graduate is no me empty form, but a passport to the confidence of his fellow-citizens. With these benef secured to him by his admission and graduation, the board feel that no exertions on t part of the recipient are too great to repay them.

In closing this communication, I feel, sir, that I should be doing injustice to Col. Smirthe superintendent of the institute, did I not bear emphatic testimony to the zeal, fideliand eminent ability he has displayed in building up this school, over which he has preside from its commencement. His native state has most happily found in him a rare combination of administrative and executive talent, that must have conducted him to eminence an fortune in any career. To these nature has conjoined, what is most rare, perfect tact the government of youth. He has shown himself, in truth, a speciality that might in value been sought for among thousands. His special mission has been wisely and successfully performed—let the commonwealth see to it, that he be as nobly rewarded.

With sentiments of the highest consideration and respect,

I have the honor to be your excellency's very ob't serv't,

D. H. MAHAN, Professor

Of Eng'ing, &c. in the U.S. Military Academy.
